

LE CORBUSIER

ARTIST BIOGRAPHY

Le Corbusier (1887-1965), the pseudonym of Charles-Édouard Jeanneret, was one of the most famous architects and furniture designers of his generation.

His internationally renowned work was dedicated to the modern man, and he often spoke of his designs as équipement or tools. In 1929, he collaborated with Charlotte Perriand and his cousin Pierre Jeanneret to present their world famous one-room studio apartment collection at the Salon D'Automme in Paris. He continued his career mostly as an architect and in 2016 seven of his projects were named World Heritage sites by UNESCO.
